

The ASHP Innovation Center elevates the vital roles hospital and health-system pharmacy practitioners play in new and emerging science. It positions pharmacy practitioners to influence the development of systems that advance the safety and quality of patient care.

What is the ASHP Innovation Center?

Mission is to influence innovation and digital transformation in the safe and effective use of medicines

Achieve this through high-impact partnerships, education, advocacy, research, and entrepreneurship

Builds on ASHP's over 80 year history as a pioneer in advancing patient care and pharmacy practice

Provides resources members need for high-quality patient care

GOALS

Improve patient care and health outcomes

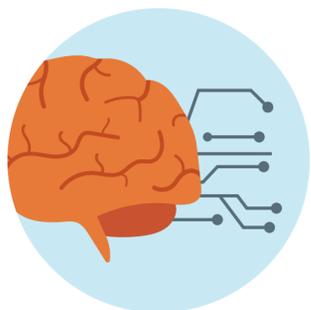

Equip ASHP members with the latest tools and resources

Foster unique partnerships to advance pharmacy innovations

INNOVATION CENTER FOCUS AREAS

Artificial Intelligence in Medication-Use Process

Telehealth Pharmacy Practice and Interprofessional Patient Care

Data Science in Pharmacy Practice and the Medication-Use Process

Pharmacogenomics and Precision Medicine

New Care Delivery Methods such as Digital Therapeutics

Research in Partnership with ASHP Foundation
