

PAI 2030

Organization Focused

ASHP's Practice Advancement Initiative (PAI) serves to drive pharmacy practice change to meet the demands of future practice and patient care delivery models. Below are the 5 domains and some recommendations outlined to drive pharmacy practice change:

Patient-Centered Care

- Lead medication education for patients and caregivers that optimize outcomes, including in transitions of care
- **Ex: Invite a Transitions of Care Pharmacist to speak with your chapter**

Pharmacist Role, Education, & Training

- Leaders should ensure their workforce has the necessary knowledge and competency to adapt to emerging healthcare needs
- **Ex: Host a roundtable with Board Certified Pharmacists in various specialties**

Technology & Data Science

- Utilize technology to ensure safe medication distribution, including compounding of sterile products
- **Ex: Organize a compounding review session and publish a review for members**

Leadership in Medication Use & Safety

- Health Systems should prioritize appropriate medication use & safety while also balancing the well-being and resiliency of their staffs
- **Ex: Host a panel to speak on the importance of well-being**

Technician Role, Education, & Training

- Foster the development of professional career paths for pharmacy technicians
- **Ex: Create an accredited pharmacy technician CE for local technicians**

Check out the [ASHP website](#) for more PAI student resources and ideas on how to promote PAI within your chapter!
